

Durable | Sophisticated | Smart

Timber Certification and Sustainability

Precise Timber Innovations is committed to the supply of products sourced from sustainable sources. All products we sell are from sources certified by either AFS, PEFC, or FSC. Our processes ensure we can identify the source of finished products.

Precise Timber Innovations has developed joining technology, which recovers timber destined for low grade use, and adds value to our valuable natural resource – reclaiming and delivering the beauty of a Durable, Solid, Australian Hardwood Timber Board

The AFCS And Forest Sustainability

Australian Forest Certification Scheme (AFCS) forests are independently (third party) certified for environmental, social and economic sustainability, and are managed and harvested in accordance with all relevant State and Australian government environmental regulations.

AFCS forests are managed in accordance with the international requirements of the PEFC (Programme for the Endorsement of Forest Certification schemes, www.pefc.org/internet/html/index.htm), an independent, non-profit, non-governmental organisation, which provides certified proof of sustainable management.
